

FALL 2017 Immunobiology Laboratory

BIOL 443(G)

Methods in Immunology
Instructor: Ritwij Kulkarni

Modern day immunologists have effectively combined their traditional toolbox of antibody- and fluorescence-based techniques with the techniques from many (if not all!) branches of Biology such as Structural Biology, Microbiology, Cell Biology and Genetics. The objective of Immunobiology laboratory course is to provide students hands-on experience in Ouchterlony, SDS-PAGE, Western Blotting, PCR, Flow Cytometry, ELISA, etc.
